# MODEL 7600 STRUT SPRING COMPRESSOR

# Branick®

Proudly Made  
in the U.S.A.

## Most trusted strut spring compressor!

Since the mid-80s we have been the tool of choice. Now the new OEM approved Model 7600 handles even tough applications like the Jeep Cherokee Trailhawk, RAV4, F-150 and GM pickups/SUVs... *without the need for adaptors*. The multi-position upper spring hooks are adjustable up to 4 inches, in 1 inch increments, giving the Model 7600 the flexibility to fit difficult coil spring configurations while its long handles provide extra torque to make compression easier. With a structural ring guard, better top nut clearance and a longer compression stroke, this is the best spring compressor on the market. Whether long, short, narrow, or angled, the 7600 will get it done. Made in the U.S.A. at Branick's manufacturing facility in Fargo, ND.

### HANDLES THE TOUGHEST APPLICATIONS!

# PRESSURE BRAKE BLEEDER G300

**Branick®**

Proudly Made in the U.S.A. 

## For anti-lock and conventional brake systems!

The Branick G-300 Pressure Brake Bleeder is another OEM-recommended product from Branick. It's a diaphragm-type bleeder that keeps fluid and air separated. It has a large 4-gallon reservoir eliminating frequent refilling and requires only one operator for both conventional and anti-lock brake systems. The G-300 comes with a quick coupler and it has wheels for mobility. It includes two of the most common adapters, the 29G and 45G9, but it will also support custom adapters for all makes and models. It also comes with a brake fluid syringe. Or, there's the G-300A that includes no adapters so that you can purchase what you prefer separately. Made at our manufacturing facility in Fargo, ND, the G-300 is made of steel and is going to be the most durable brake bleeder you've ever had in your shop - guaranteed.

### FEATURES

Diaphragm-type bleeder.....	Keeps fluid and air separated
4-gallon reservoir.....	Large capacity for less frequent fills
Includes most common adapters 29G and 45G9 and brake fluid syringe.....	Allows for application versatility
G300A does NOT come with adaptors.....	Purchase what you prefer separately
Made in the U.S.A.....	3-year warranty!*

# TC400 TIRE CART

**Branick®**

Proudly Made  
in the U.S.A.

## The original tire cart!

The Branick tire cart has been copied many times but, according to numerous customers, has never been duplicated. No one is able to match the strength, durability and versatility of our tire cart. Laser cut frame components create a rigid frame on the TC400 to prevent twisting in the handles and steel construction means you'll be using it for many years. This easy to use cart has a foot operated opening and auto-closing tire cradle. The hydraulic springs maintain a constant clamping pressure on the tire stack, making sure tires stay on the cart! The cradle operating range is the largest on the market, handling everything from 20" to 37" tires. The airless no-flat tires run on precision bearings and provide the feel of a pneumatic tire with the durability of a solid tire. Made in the U.S.A. at Branick's manufacturing facility in Fargo, ND!

### SPECIFICATIONS

**Operating Range**  
20" - 37" Tires

**Maximum Stack Height**  
61.5" Total Height

### FEATURES

- Hands Free, Foot Operated Opening
- Durable Steel Construction for Long Life
- Larger Slotted Pedals for Sure Grip
- Hydraulic Spring actuated Auto-Closing Arms
- Holds Tire Stack Securely

Makes moving  
tires easy.

Auto-clamping arms  
hold tires in place.

# TIRE INFLATION CAGE 2040

# Branick®

Proudly Made  
in the U.S.A.

## Get off the table and into a cage!

Branick is the **ONLY** manufacturer using the highest quality, two and a quarter inch diameter, **high yield steel tubing** that has expansion properties to ensure strength and durability. All meet OSHA requirements and the arched tube design is engineered for maximum energy displacement. Branick is also the **ONLY** cage manufacturer using No-Mar coating to protect expensive rims. The Model 2040 stands 46" tall and comes with four bars in order to meet the challenges of all shops. It can handle tires with a maximum width of 21.5" (cross section) and maximum diameter of 41". If you typically only inflate run flats, passenger and light truck tires, the shorter cages are ideal, especially for run-flats and high pressure tires. Combine the No-Mar cage with our BlockHead Auto Inflator, both of which can handle run-flat and high pressure tires, to create a more efficient and safer environment for your workers.

# TIRE TOOL STATION 2400

# Branick®

Proudly Made  
in the U.S.A.

## Organize your tire tools!

Simply put, the Model 2400 Tire Tool Station is an organized, one stop place for tire service tools. The strength and durability makes this tire tool station just as tough as the guys who use it. The top tray has slots for torque sticks and other tire service tools; there's a lower tray for additional storage and bolt holes for mounting the tool station to the floor. It comes with 3/8 by 25 foot recoil hoses and there are universal cradles on each side for impact wrenches. You provide the tools and the Model 2400 will keep them organized and always within reach. Made in the U.S.A. at Branick's manufacturing facility in Fargo, ND!

### FEATURES

3/8" ID x 25' recoil air lines.....

1/4" swivel fittings.....

Universal slotted tool tray.....

Center tray.....

Universal impact gun cradles...

Floor bolting holes.....

1/4" air line connection.....

Made in the U.S.A.....

### BENEFITS

Keeps hoses within reach, but out of the way of your work

No more wrestling with hoses while you work

Perfect for torque sockets and any other tools

Keep small parts handy for common services

Impact gun will always be where you need it

Pre-drilled holes make it easy to floor mount

Overhead or floor connection

3-year warranty!\*

# ROLLING JACKS

## 8700/8900

# Branick®

Proudly Made  
in the U.S.A. 

### Fits all the most popular 4-post lifts!

Made at the manufacturing facility in Fargo, ND, Branick's Rolling Jacks fit the most popular 4-post lifts, replacing original equipment jacks. Available in both 7,000 and 9,000 pound capacity, these heavy duty, air-hydraulic powered rolling jacks come with telescoping mounting brackets and the lift arms adjust from 33 to 50 inches. The narrow width allows easy access to the area of the vehicle being serviced, and the spring-loaded mounting bracket rollers allow the jack to be easily positioned, and then automatically locked into place when weight is applied. There's also a mechanical 3-position lock. Extension adaptors are available for an additional 7.5". Branick's quality jacks will carry the load for you with ease.

A jack extension kit is also available for when you need added lift.

**Branick makes jack brackets for the following brands:**  
Rotary, JBC/FMC, Hunter, Acanus, Wheeltronics

#### FEATURES\*

Air/hydraulic rolling jacks.....	Ease of use
Telescoping mounting brackets.....	For easy installation
Lift arms adjust.....	Allowing a variety of vehicle applications
Fits the most popular 4-post lifts.....	Replaces original equipment jacks
Narrow width.....	Allow easy access to vehicle
Spring loaded mounting bracket rollers.....	Allow jack to be easily positioned; locks into place when weight is applied

#### OPTIONS

Extension adaptors.....	For additional height - 7.5"

# TIRE CUTTERS HD-BTC/HD-BTC/G

# *Branick*

Proudly Made  
in the U.S.A.

## One revolution is all it takes!

Reduce wear on tire shredder blades and slice 80 tires an hour! Tires cut in half can easily stack by nesting together, reducing occupied floor space by 60%! Double the number of tires in a single load to decrease scrap tire loads. Simple one person operation and the ability to handle a large range of tires make this versatile machine a great addition to your tire shop. Offered in both electric and gas powered models.

HD-BTC - Electric-powered model  
HD-BTC/G - Gas-powered model

### FEATURES

High-strength steel blade..... Cuts through a radial truck tire in one revolution  
25 gallon oil reservoir..... Keeps cutter running cool and efficient  
Two-hand starting system..... Keeps operator's hands free of the cutting blade

### BENEFITS

# TIRE SPREADER 5045/5035

# Branick®

Proudly Made  
in the U.S.A.

## High performing passenger and light truck tire spreader!

The Branick 5045 Tire Spreader is the solution for your Low-Pro and Wide-Base tire customers! This versatile spreader features a new design that is beyond efficient. The high-impact industrial light is mounted on a flexible arm making it easier for inspection and repair. It uses a CFL bulb that is RMA compliant, meaning our bulbs emit a minimum of 200 foot candles, which the RMA requires for proper tire repairs. The popular quick saw-tooth adjustments and the zinc plated rollers make this model a perfect mix of new technology and old comfort. It will handle tires up to a 13" cross section and up to 40" diameter. Made in the U.S.A. at Branick's manufacturing facility in Fargo, ND! \*\*Model 5035 also available - same as 5045 minus gas spring and rollers.

\*Branick bulbs emit a minimum of 200 foot-candles, which is required for tire repair.

5045 w/ riser and storage cabinet

# TIRE SPREADER 5120

# Branick®

Proudly Made  
in the U.S.A.

## Versatile and easy to use spreader!

The Model 5120 is typically used for both passenger and light truck tires when you need a little more from a spreader. It is air powered, easy on the operator and your bottom line. It comes with a convenient tool tray that can be mounted on either side of the spreader. The stable 4-point base can be bolted to the floor and there's a foot control valve for spreading the tire, which also gives you a stable work surface. There is an easy spring-loaded adjustment and the high-impact industrial light is mounted on a flexible arm making it easier for inspection and repair. It uses a CFL bulb that is RMA compliant, meaning our bulbs emit a minimum of 200 foot candles, which the RMA requires for proper tire repairs. Made in the U.S.A. at Branick's manufacturing facility in Fargo, ND!

\*Branick bulbs emit a minimum of 200 foot-candles, which is required for tire repair.

### FEATURES\*

Handles everything from passenger to truck tires.....	Well-rounded spreader for busy shop
Tool tray can be mounted on either side.....	For easy accessibility
Foot-control valve for spreading.....	Quick, hands-free spreading and stable work surface
Spring loaded adjustment.....	Ease of use; all parts contained
High impact industrial light on flexible arm.....	Easy inspection and repair; RMA Compliant

### SPECIFICATIONS

Handles passenger and light truck tires up to 20"

\*See manual for details.

# TIRE SPREADER 5500

**Branick®**

Proudly Made  
in the U.S.A.

## Most versatile; most popular spreader!

The Model 5500 is the most wanted spreader for tire shops. It can handle everything from passenger tires to super-singles, but it's typically used to inspect and repair truck tires. It has adjustable height and a tire ramp for loading. The 5500 has manual tire rotation and the tool tray swivels for left or right hand operation. The tool tray also has four air ports – two on each side. The controls for the lift, as well as the spreader are also located on both sides of the unit. Tires load easily onto the platform, an air cylinder lifts the tire up to 35 inches off the ground and the tire ramp retracts automatically for complete accessibility. The ramp extends out again when lowered. Made in the U.S.A. at Branick's manufacturing facility in Fargo, ND!

### FEATURES\*

Handles everything from passenger to super-singles!.....  
Has adjustable height and a tire ramp.....  
Lifts 35" off ground.....  
Manual rotation with a tool tray that swivels left and right..  
Controls for the lift are on both sides of the unit.....

### BENEFITS

Well-rounded spreader for busy shop  
Tires load easily  
Perfect inspection and repair station  
Complete accessibility  
For both left hand and right hand operation

### SPECIFICATIONS

Handles passenger, light truck and commercial truck tires up to 24.5", including super-singles.

your SmartPhone!

\*See manual for details.

# TIRE SPREADER AH-RI-R

# Branick®

Proudly Made  
in the U.S.A.

## Air powered Adjustable Height Tire Spreader!

The Model AH-RI-R is typically used for both passenger and truck tires. It is air-powered and the tire rolls up the ramp when the machine is in the lowered position. The controls are mounted on a pivoting control panel and the tire rotates via the foot controls. The high-impact industrial light is mounted on a flexible arm making it easier for inspection and repair. It uses a CFL bulb that is RMA compliant, meaning our bulbs emit a minimum of 200 foot candles, which the RMA requires for proper tire repairs. Made in the U.S.A. at Branick's manufacturing facility in Fargo, ND!

\*Branick bulbs emit a minimum of 200 foot-candles, which is required for tire repair.

### FEATURES\*

Air powered.....	Ease of use
High-impact industrial light on a flexible arm.....	Easy inspection and repair; RMA Compliant

### BENEFITS

### SPECIFICATIONS

AH-RI-R handles passenger tires up to 24.5"

\*See manual for details.

# TIRE SPREADERS LR/LR-EF

# Branick®

Proudly Made  
in the U.S.A.

## Affordable, air-powered tire spreaders!

The Model LR and LR-EF are typically used for both passenger and truck tires. These spreaders are air-powered and the LR-EF has an easy to use tire lift. They are affordable and a simple solution for truck tires. The high-impact industrial light is mounted on a flexible arm making it easier for inspection and repair. It uses a CFL bulb that is RMA compliant, meaning our bulbs emit a minimum of 200 foot candles, which the RMA requires for proper tire repairs. And if you are looking to save some money, the model LR comes without the tire lift. Made in the U.S.A. at Branick's manufacturing facility in Fargo, ND!

\*Branick bulbs emit a minimum of 200 foot-candles, which is required for tire repair.

### FEATURES\*

LR-EF comes with a tire lift.....	Tires load easily
LR does NOT come with a tire lift.....	Affordable, air-powered spreader option
High-impact industrial light on a flexible arm.....	Easy inspection and repair; RMA Compliant

### SPECIFICATIONS

LR and LR-EF handle passenger tires from 13" - truck tires from 16.5" - 22.5" dia.

# TIRE SPREADERS

## EF / EF-HD

# Branick®

Proudly Made  
in the U.S.A.

### Branick's signature line of tire spreaders!

The Models EF and EF-Heavy Duty have helped to define Branick over the years. They're synonymous with quality and endurance and are truly built for generations. These air-powered spreaders were designed for everything - passenger, bus, truck, even tractor tires, and they are perfect for super-singles. The tire can rotate 360 degrees for inspection, repair or buffing, and the floor mounted controls lift and spread the tire. On the EF, the spread arms pivot into the beads and on the EF-Heavy Duty, they slide into the outer beads before the tire is spread. The EF-Heavy Duty can consistently handle the largest of truck tires and to add to its heavy duty signature, some aircraft tires as well. Made in the U.S.A. at Branick's manufacturing facility in Fargo, ND!

#### FEATURES\*

Tire rotates 360 degrees for inspection, repair or buffing.....	Complete accessibility
Air powered with floor mounted controls.....	Hands-free to lift, spread or inspect
EF - spread arms pivot into the beads.....	Ease of operation
EF-HD - the spread arms slide into the outer beads.....	Ease of operation

#### SPECIFICATIONS

EF handles tires 600-13"/1200-24 12" to 28" Bead  
EF-HD handles the same sizes as EF, as well as  
some aircraft tires and tires up to 1400-24" 20 Ply

your SmartPhone!

\*See manual for details.

# TIRE SPREADER S-FLL

# Branick®

Proudly Made  
in the U.S.A.

## Ground level spreader perfect for service trucks!

The Model S-FLL is an affordable, ground level spreader that can handle smaller tires from 15 inches through standard truck tires and yet, it's still air powered with adjustable spread hooks. It's perfect for carrying on your service truck for repairs that need to be done in the field. Without any other bells and whistles, this spreader just gets the job done at a great price. Made in the U.S.A. at Branick's manufacturing facility in Fargo, ND!

**Perfect for your  
service truck!**

### FEATURES\*

Ground level spreader..... Perfect for carrying on service truck  
Air powered with adjustable spread hooks..... Affordable, easy to use spreader

### BENEFITS

### SPECIFICATIONS

S-FLL can handle tires from  
15" - 16.00-24" 20 Ply

# TIRE INFLATORS AIRHEAD

*Branick®*

## Tough, time-saving tire inflator!

The AirHead has a high strength aluminum body and is tough enough to withstand the abuse that is common in a shop. It has an easy to read magnified linear scale, which is in a sealed environment ensuring debris isn't going to affect the reading. You'll save time because you can inflate and deflate without removing the inflator from the valve stem. The AirHead has two models that handle from 138 psi to 174 psi. Both are certified and calibrated to  $\pm 2$  psi. There's several hose lengths and a variety of chuck styles to choose from.

**No More Back And Forth!**

### FEATURES

Valve design that increases inflation/.....Fast, high-flow inflator  
deflation rates

Cast aluminum body..... Built to withstand the harshest work environments

Proven linear spring gauge..... Durable and accurate

Magnified clear linear gauge display..... Easy to read

Individual testing and certification..... California CARB Compliant!

Large range of options and accessories..... Versatile inflator that will withstand the  
tough shop environment

### BENEFITS

Watch the video with  
your SmartPhone!

# TIRE INFLATOR DIGITAL AIRHEAD

**Branick®**

## Premium electronic tire inflation!

The Digital Airhead is a sophisticated handheld electronic tire inflator. With leading electronics and sensor technology, it offers fast, accurate, trouble-free inflation and deflation. The Digital AirHead was developed with rugged engineering plastics to meet the exacting specifications of high volume and intensive applications. The light weight and clever design improves the product's ability to withstand shock, further increasing operating life. It has an ergonomic handle and has an easy-to-read display. The Digital AirHead also allows you to inflate and deflate without removing the inflator from the valve stem. Accuracy and speed are further enhanced by the advanced software, while the clear digital display reduces the risk of human errors. The Digital AirHead is calibrated to two tenths psi.

### FEATURES

Leading electronics and sensor technology.....

Rugged engineering plastics.....

Light weight and clever design.....

Ergonomic handle and direct valve.....  
mechanism

Robust ceramic sensor.....

Advanced software and clear digital display....

### BENEFITS

Offering fast, accurate, trouble-free inflation and deflation

Meets the exacting specifications of high volume and intensive applications

Improves product's ability to withstand shock, further increasing operating life

Provides comfort and excellent rates of inflation and deflation

Allows precise measurement with tolerances well above the industry standards

Accuracy and speed are enhanced and reduces the risk of human error

# TIRE INFLATOR BLOCKHEAD

# Branick®

**Remove the manual process  
from tire inflation!**

The Branick BlockHead Auto Inflator removes the need for stick or hand-held gauges! The BlockHead has auto inflate and deflate capabilities with an audible beep to let you know the tire is ready. You just set the pressure, connect the chuck and the auto inflator does the rest. There are multiple ways to install the BlockHead including mounted on the wall direct from any air supply, utilizing existing hose reels, using a manifold for 4-6 tires simultaneously, or mounted on a tire safety cage. The BlockHead has a safety feature for high pressure tires and comes with an air chuck and fill hose. It is also nitrogen conversion ready and comes with a one year warranty.

**Mount to tire  
safety cage**

**Utilize existing  
hose reels**

**Manifold for  
4-6 tires  
simultaneously\***  
\*Manifold and valve  
kit required

## FEATURES

- No stick/hand-held gauges.....
- Auto inflate and deflate without leaving....
- Simple touch-screen technology.....
- Multiple installation options.....
- Safety feature for high pressure tires.....
- Nitrogen conversion ready.....

## BENEFITS

- No more wasted time!
- No more back and forth from valve stem
- Set pressure, connect chuck and BlockHead does the rest
- Versatile and easy to use
- Audible beep sounds when tire is ready
- One-stop for all your inflation needs

**Watch the video with  
your SmartPhone!**

# TIRE INFLATOR BLOCKHEAD PRO

# Branick®

## Two Year Warranty and Unit is Waterproof!

Over 14,000 shops worldwide use the **UL Certified** BlockHead Pro. With traditional inflation tools, accuracy is an issue and the lack of durability is a nuisance. With 145psi output, the BlockHead Pro offers consistent accuracy, time saved due to faster calibration of tires, and money saved on inaccurate, disposable pen gauges. It also may be the only inflator on the market with a TWO year warranty. Looking for an auto inflator for your service truck? This unit is also waterproof so mount it on your truck and go.\*\* There are several ways to mount the BlockHead Pro depending on needs, and with the self-coil hose, you'll have fewer overhead hose reels. This auto inflator saves time - no more back and forth from the valve stem, and provides versatility, accuracy and safety to your shop.

**Mount to tire  
safety cage**

**Utilize existing  
hose reels**

**Manifold for  
4-6 tires  
simultaneously\***  
\*Manifold and valve  
kit required

### FEATURES

No more pencil gauges.....	Save time and money!
Auto inflate and deflate without leaving....	No more back and forth from valve stem tire stem
Wall mount with self-coil hose.....	Fewer overhead hose reels
Less air leaks in hose lines.....	Less energy and noise pollution
Simple touch-screen technology.....	Set pressure, connect chuck and BlockHead Pro does the rest
Multiple installation options.....	Versatile and easy to use
Safety feature for high pressure tires.....	Accuracy and safety for techs and customers
Waterproof.....	Perfect for service trucks
Nitrogen conversion ready.....	One-stop for all your inflation needs
Two year warranty.....	See manual for details

\*\*Needs access to 120v AC

## What The Dealer Gets!

- Inclusion in the GNI Nitrogen Dealer Locator
- Consistent customer contact through dealer branded monthly newsletters
- Full suite of marketing tools including:
  - Email Blast
  - Texting
  - Surveys
- Marketing designed to return the customer to your location
- Searchable database of all registrants with ability to add additional customers
- Increased customer return visits

# Model 350 Wall Mount Nitrogen Inflation System

Watch the video with your SmartPhone!

Proudly Made in the U.S.A.

## Space saving PRISM Membrane option!

If floor space is hard to come by, and complete mobility isn't necessary, the Branick line of wall-mounted nitrogen generators are for you. Speed and purity are not compromised with our wall mount units that range from entry level to high volume applications. The Model 350 typically services motorcycles to passenger vehicles. Because of the PRISM Membrane, the system also acts as an air dryer, which means the system produces a more consistent purity over the lifespan of the machine. Intended for the smaller dealer, the Model 350 uses the same membrane technology as larger systems and requires minimal input pressure.

**AND 5 Years of FREE filters!**

### FEATURES

Wall mount nitrogen generator.....	Space saving
PRISM Membrane.....	Exclusive technology providing exceptional speed and purity
No air dryer needed.....	Produce a more consistent purity over lifespan of system

### BENEFITS

# Model 1000 Tower Nitrogen Inflation System

Watch the video with your SmartPhone!

## Ideal for medium volume shops including light volume commercial centers!

The Model 1000 is our most popular generator for most commercial truck tire applications. This tower system incorporates a double membrane system that is capable of generating enough nitrogen to inflate an average truck tire in less than 3 minutes! With the capability to handle medium volume passenger and light truck facilities, as well as light volume commercial truck applications, it's a real workhorse. When you mean business, our nitrogen tower generators can tackle any task and offer the most bang for your buck. Because of the PRISM Membrane, our systems also act as an air dryer, which means they produce a more consistent purity over the lifespan of the machine.

Proudly Made in the U.S.A.

**AND 5 Years of FREE filters!**

### FEATURES

Inlet and outlet pressure gauge.....	Measures inlet and outlet pressure
Purity adjustment.....	Allows for service on a variety of applications
Auto shut-off.....	Less wear on your compressor
PRISM Membrane.....	Produces a more consistent purity over lifespan of system
Air to nitrogen ratio 1.9:1.....	Less wear on your compressor; most efficient in marketplace

### BENEFITS

### SPECIFICATIONS

Operation Temp .....	40° to 150°F
Inlet Port .....	3/8 NPT
Outlet Port .....	3/8 NPT
N2 Purity Port .....	Yes

Auto Shut-Off .....	Yes
Pre-Filters.....	2
N2 Outlet Press Gauge..	Yes
Dimensions .....	19" x 19" x 72"
Weight .....	210 Lbs

# Model 1500 Tower Nitrogen Inflation System

Watch the video with  
your SmartPhone!

## For high volume commercial centers and OTR applications!

The Model 1500 is the largest generator in the Branick line. This triple membrane tower system was designed for high volume commercial shops and OTR applications. When you mean business, our nitrogen tower generators can tackle any task and offer the most bang for your buck. Need access in multiple bays? Heavy volume? Commercial truck tires? The Branick 1500 Tower is the system for you. Because of the PRISM Membrane, our systems also act as an air dryer, which means they produce a more consistent purity over the lifespan of the machine.

Proudly Made

# Dakota 8 and 12 Nitrogen Inflation Systems

Watch the video with  
your SmartPhone!

## Perfect for your service truck!

If your definition of mobile is a service truck, then the Dakota 8 or 12 is what you need. Both are compact, easily mount to any service truck and work in all types of weather. Being from North Dakota, we tested in temperatures as low as 20 below zero, these generators produced a consistent purity in both extreme cold and extreme heat, day in and day out. These units efficiently produce the high volume nitrogen output you need, allowing you to service large tires quickly. And because of the PRISM Membrane, our systems also act as an air dryer, which means they produce a more consistent purity over the lifespan of the machine. Now you can offer nitrogen service to all of your accounts with equipment from one of the most trusted suppliers in the industry.

Proudly Made  
in the U.S.A.

### FEATURES

Compact nitrogen inflation system.....	Easily mounts to any service truck
Produces consistent purity in extreme weather.....	Tested in temps as low as 20 below zero!
Produces high volume nitrogen output.....	Allows you to service large tires quickly
PRISM Membrane.....	Acts as an air dryer; produces a more consistent purity

### BENEFITS

### SPECIFICATIONS

Operation Temp .....	-30 to 150 F
Inlet Port .....	3/8 NPT
Outlet Port.....	3/8 NPT

Pre-filters.....	3
Dimensions.....	48" x 27" x 18"
Weight Dakota 8 .....	250 lbs
Weight Dakota 12.....	270 lbs

# Custom Engineered Nitrogen Inflation Systems

Proudly Made  
in the U.S.A.

Sishen Mines Republic of South Africa

## When standard just won't do!

Branick's professional line of custom engineered nitrogen inflation systems are available for every unique tire filling application. When a standard nitrogen system is not enough, Branick fleet specialists custom design a system to meet the demand. Their involvement includes all aspects of the system from air audit to installation and training.

When you need to service large construction or mining vehicles, Branick has, or can design the right system for you!

# Model 120 Mobile Nitrogen Inflation Carts

## Allows for flexibility and mobility!

Need flexibility with automotive, light truck or commercial nitrogen inflation? The Model 120 Cart allows you to either connect to a generator or use the cylinder configuration to deliver high purity nitrogen service with easy mobility. The Model 120 is fully automatic and comes standard with four hoses with clip chucks, though there are six conversion ports capable of handling dualies or spares. The unit can operate all day on battery power or can be plugged into a 110v outlet. With features like full programmability, a top-off function and a pressure range up to 145 psi, the model 120 will make your nitrogen service simple, fast and economical.

### FEATURES

Connect to a generator or use cylinder configuration.....	Deliver high purity nitrogen with easy mobility
Comes with four hoses with ability to add two more.....	Service multiple tires at once including dualies or spares
Battery powered or plug into 120v outlet.....	Allows for mobility
Full programmability.....	Ease of use

### BENEFITS

### SPECIFICATIONS

Operation Temp .....	10°F to 158°F	Pressure Range.....	up to 145psi
Dimensions .....	58" x 20" x 16"	Max. Input Pressure.....	175psi
Weight .....	90 Lbs.	Min. Input Pressure.....	30psi greater than set pressure
Battery.....	12V		
Power Supply.....	110v

# Viking 370 Mobile Nitrogen Inflation System

Watch the video with your SmartPhone!

## Fast, affordable PSA option!

The Viking Family is Branick's line of nitrogen systems powered by PSA technology. The Viking 370 has all the features of more expensive systems at a price that is affordable. Just connect to the compressor and you can inflate or convert up to 4 tires at once, with the option to add two additional hoses. All of our PSA units feature PCL inflators, guaranteeing fast and accurate nitrogen inflation. They are fully automated and programmable, and have an inlet PSI gauge allowing you to easily verify sufficient air supply to the generator. Each Viking is mobile and has one-touch operation for conversion or top-off applications. There are visual and audio signals for progress and completion, and the auto inflators include comprehensive error reporting and self-diagnostics. There are also two exterior high performance air inlet filters.

### FEATURES

Large backlit LCD display.....	Easy to read
Visual and audio signals for progress and completion.....	No guesswork involved
Comprehensive error reporting and self diagnostics.....	Ease of maintenance
Twin exterior high performance air inlet filters.....	Fastest PSA units powered by PCL technology!

### BENEFITS

### SPECIFICATIONS

Operation Temp .....	- 4° to 158°F
Dimensions .....	29" x 25" x 51"
Shipping Weight .....	340 Lbs.

### OPTIONS

30-gallon storage tank
------------------------

Honda Accord 4 min. @ 32psi, 175/65R15 Dodge Ram 1500 10 min. @ 35psi, 245/70-17  
Times possible with Model 370 AND optional tank.

THE INTELLIGENT DRAIN PLUG

www.smart-o.info

# Tips

## Top five benefits of using SMART-O.

### 1. O-ring expands .

Upon contact with oil,  
essentially sealing against  
leaks or vibrating loose

### 2. Only 17 SKUs .

To cover 99% of the vehicles  
on the road, providing an  
inventory reduction  
opportunity

### 3. Plug and washer come packaged together .

for ease of matching and faster service

### 4. IT'S REUSEABLE! .

For additional oil changes, remove the  
plug and set aside - The o-ring  
contracts as it dries. After vehicle  
service, the plug is ready to go back  
in the pan

### 5. Over 500,000 oil changes and counting .

SMART-O has been in the market for several  
years providing maximum protection for  
customers and the environment

**Branick**

# Don't just **CHANGE** oil... **CHANGE** your thinking!

Now you can make more out of this often forgotten, but critical part of the engine. Keep the oil in the pan and the cash flowing in - with the safest, most effective and most powerful drain plug program in the market.

Protection + Performance + Profit
